## TABLE OF CONTENTS

|   | Page |
|---|------|
| Introduction .....                                      | 5    |
| Reusable packaging .....                                | 7    |
| Non-reusable packaging .....                            | 8    |
| Goods returned after export .....                       | 8    |
| Units of measure .....                                  | 11   |
| Abbreviations .....                                     | 13   |
| Summary of the classification .....                     | 18   |
| Numeric schedule  |      |
| 00           -   Live animals .....                     | 25   |
| 01 to 18   -   Food, feed, beverages, and tobacco ..... | 26   |
| 20 to 29   -   Crude materials, inedible .....          | 54   |
| 30 to 49   -   Fabricated materials, inedible .....     | 68   |
| 50 to 96   -   End products, inedible .....             | 188  |
| 97           -   Special transactions, trade .....      | 347  |
| 99           -   Special transactions, non trade .....  | 348  |
| Alphabetical index .....                                | 349  |

## THE CANADIAN INTERNATIONAL TRADE CLASSIFICATION

The Canadian International Trade Classification (C.I.T.C.) presented in this manual is the product of a joint effort by Revenue Canada, Customs and Excise and Statistics Canada, External Trade Division. It has been designed to facilitate both the administration of various acts and regulations applying to the importation of goods and the compilation of merchandise import statistics. The version found in this manual replaces the C.I.T.C. commodity index which was introduced April 1, 1972, and subsequent updates. This schedule of commodity codes will become effective January 1, 1978, although imports documents with new codes will be accepted any time after December 1, 1977.

### A) Scope of Revision

Over the past five years many constructive comments have been submitted by brokers, importers and industry groups suggesting improvements in the classification structure and in the manual formats. Specialists from Customs and Excise and Statistics Canada have relied heavily on this base of information in developing a revised C.I.T.C. schedule. The revision process has left the overall structure of the classification and the general principles for using it intact. The most notable changes are the general clarification of all rules dealing with the treatment of special cases, the amalgamation of the numeric schedule and alphabetical index into a single manual and the provision of both metric and imperial units of quantity as options to facilitate the country's metric conversion programme. Revisions in the detail of the classification often reflect efforts to minimize commodity identification difficulties encountered in the preparation of customs entry documents. In many areas of the classification one will find instances where several commodity codes have been contracted to a few and where commodity definitions for C.I.T.C. codes have been altered to reflect actual import documentation.

### B) Manual Format

This manual has been organized into three parts:

- Part I -Introduces the classification structure and some basic concepts; provides a description of terms and describes procedures for dealing with special cases; demonstrates the process of locating a commodity code.
- Part II -Presents a numeric schedule of the C.I.T.C. commodity classification. Content descriptors have been organized at three levels. At the three-digit level, the schedule provides explanatory notes delineating the product boundaries found within the group. Five digit commodity headings generally describe a family of like commodities. Finally at the most detailed seven-digit commodity level, specific products are identified by the descriptor. At this final level one finds the required units of measure defined in both metric and imperial alternatives together with the most typical tariff codes for the identified commodity. The purpose of this section is to allow users of the manual to become familiar with broad product categories presented in the classification, to facilitate the review of complete commodity families and to allow highly specialized importers to concentrate their attention on a select portion of the C.I.T.C. schedule.
- Part III -Contains an alphabetical index to the C.I.T.C. schedule found in Part II. The keyword principle is employed in determining the alphabetical placement of an individual product descriptor. The purpose of this section is to facilitate the selection of the correct C.I.T.C. code based on the user's understanding of a commodity description.

### C) The Structure of the C.I.T.C.

The structure of the C.I.T.C. corresponds to that of the Statistics Canada Standard Commodity Classification, which divides commodities into three main groupings: crude materials, fabricated materials and end products. Crude materials are raw products or those subject to preliminary processing (e.g. wool scouring) only. End products are articles rather than materials (i.e. finished commodities). Once these two categories have been defined, fabricated materials are those which remain.

Live animals; food, feed, beverages and tobacco; and certain special transactions are treated separately for reasons which need not be explained at length. The result is a seven-way breakdown of the classification into "Section", as follows:

|          |   |                                    |
|----------|---|------------------------------------|
| 00       | - | Live animals                       |
| 01 to 18 | - | Food, feed, beverages, and tobacco |
| 20 to 29 | - | Crude materials, inedible          |
| 30 to 49 | - | Fabricated materials, inedible     |
| 50 to 96 | - | End products, inedible             |
| 97       | - | Special transactions, trade        |
| 99       | - | Special transactions, non trade    |

The Sections are in turn composed of groupings of similar products identified at the three digit level. Groups up to the End Products, Inedible section (50) follow the principle of separating products according to their material content. An example of this would be group 451, Aluminum, Including Alloys, which contains only the non-ferrous metal aluminum and its alloys. The End Products, Inedible section identifies groups on the basis of end use. An example of this would be the group definition for 671, Plumbing Fixtures and Sanitary Ware. For additional detail on section and group level commodity definitions please refer to page 18. At the detail level we find the five-digit numbers relating to a family of like commodities which in turn are identified in specific terms at the seven-digit level. With regard to the specific identification of commodities at the seven-digit level, two exceptions must be mentioned. The N.E.S. or 'Not Elsewhere Specified' classes are encountered in all instances where an exhaustive itemization of individual products is not possible and accordingly a residual category is necessitated. The primary difference between the N.O.P. or 'Not Otherwise Provided For' categories found in the Custom Tariff and the N.E.S. definitions is that the C.I.T.C. relates the N.E.S. classes to a logical product structure while the Tariff merely provides residual categories.

The C.I.T.C. classification employs the following standard definitions for the final two digits throughout the schedule:

|      |   |
|------|---|
| '10' | -utilized when only a single commodity code is required to define all products within a five-digit level.                                   |
| '90' | -represents the N.E.S. class if no other N.E.S. class has been defined within the five-digit family.  |
| 'X9' | -If the final digit of a C.I.T.C. class is 9 then it must represent an N.E.S. and more than one N.E.S. exists within the five-digit family. |
| 'X8' | -a class ending with a final digit of 8 can only be a 'parts of' class and will not require any quantity information.                       |

## D) Terms and Special Instructions

### *Keywords and Sequence*

As in most product directories, the alphabetical index (part III) employs the keyword concept where the first word of the product descriptor is usually the principal noun. An item such as men's nylon raincoats would be found under the R section of the index with a descriptor of "Raincoats, men's, nylon". For certain product families the keyword concept is supplemented by 'look-see' descriptors such as the following examples:

SEDANS ... SEE CARS  
LIGHTING FIXTURES ... SEE FIXTURES, LIGHTING

All descriptors in the index have been arranged in ascending alphabetical sequence. All numerics found at the beginning or within a descriptor have been disregarded and the item is found under the appropriate alpha section. The product '2, 4-D Ester Dusts' will be found under the D section of the index.

### *Abbreviations*

A substantial number of descriptors required the use of abbreviations to remain within the standard space allotment. Please note that the abbreviations do not necessarily conform to forms commonly encountered. A comprehensive list of all abbreviations used is found on page 13.

### *Tariff Items*

The numeric schedule (part II) presents a maximum of three tariff items for each individual C.I.T.C. code or alternatively provides a 'various' indicator. The tariff items shown represent the items most commonly used with the commodity code in question. The list is not necessarily exhaustive nor does it have any legal standing. Should the term 'various' appear adjacent to a commodity code, it serves notice that an extensive array of appropriate tariff items exist

for this product, too numerous to list. The authority for finally determining the tariff item under which any commodity should be imported remains solely with Revenue Canada, Customs and Excise.

### *Units of Measure*

Both the numeric schedule and the alphabetical index present imperial and metric unit of measure alternatives for a C.I.T.C. code. Each option is represented by an alphabetic abbreviation of the measure description and a two-digit numeric code. The numeric code is used in the actual completion of a commodity line on a B-3, B-6 entry. Of course, one must take care to ensure that the quantity information placed in the quantity field of the entry line corresponds to the unit of measure code selected. For all cases where the tariff used specifies a quantity which does not conform to the quantity requirement of the selected C.I.T.C. code, the tariff requirements are overriding. If the tariff item does not dictate the use of a particular unit of measure for the purpose of levying a specific rate of duty, the unit of quantity shown with the C.I.T.C. code must be used.

### *Packaging*

The selection of the correct commodity code for packaging depends on two factors; whether it is commercially reusable or not; whether identification of the packaging is possible. If the packaging is identifiable in terms of the commodity descriptions provided below and if it is commercially reusable, it will fall in the '950' commodity group. Examples of commercially reusable packaging are paper cores, metal gas cylinders and wire reels. If the packaging is commercially reusable and identification in terms of the '950' classes is not possible, assign one of the '970' commodity group codes found on page 8. Finally, any packaging which is not considered commercially reusable should also be assigned a commodity code from the '970' group detailed on page 8.

#### Reusable Packaging

|  |           |     |    |
|--|-----------|-----|----|
| Barrels and drums, metal repeat shippers .....         | 950 19 30 | No. | 10 |
| Cylinders, metal, gas, repeat shippers .....           | 950 24 30 | No. | 10 |
| Bottles, metal, gas, repeat shippers .....             | 950 24 30 | No. | 10 |
| Reels, metal, for shipping goods .....                 | 950 29 60 | —   | —  |
| Bottles, mercury, iron or steel .....                  | 950 29 90 | —   | —  |
| Bottles, glass, for alcoholic beverages .....          | 950 32 10 | —   | —  |
| Ampoules, glass, except laboratory .....               | 950 36 20 | —   | —  |
| Carboys and demijohns, glass .....                     | 950 36 30 | —   | —  |
| Bottles, glass, soft drink .....                       | 950 36 60 | —   | —  |
| Bottles, glass, milk .....                             | 950 36 75 | —   | —  |
| Jars, glass, containers, nes .....                     | 950 36 90 | —   | —  |
| Shipping and distribution containers, glass, nes ..... | 950 36 90 | —   | —  |
| Boxes, egg, paperboard .....                           | 950 41 20 | —   | —  |
| Egg cartons, paperboard .....                          | 950 41 20 | —   | —  |
| Egg cartons, molded, pulpboard .....                   | 950 41 30 | —   | —  |
| Boxes/cartons, auto parts, paperboard .....            | 950 45 20 | —   | —  |
| Boxes/cartons, auto parts, solid fibreboard .....      | 950 45 20 | —   | —  |
| Boxes/cartons, corrugated shipping, nes .....          | 950 45 69 | —   | —  |
| Boxes/cartons, solid fibreboard, shipping nes .....    | 950 45 69 | —   | —  |
| Cores, paperboard for winding paper .....              | 950 47 30 | M   | 17 |
| Cores, paperboard for winding, nes .....               | 950 47 90 | M   | 17 |
| Cans, fibre with or without ends .....                 | 950 48 10 | —   | —  |
| Drums, fibre with or without ends .....                | 950 48 10 | —   | —  |
| Barrels and kegs, wooden/tight/ .....                  | 950 55 20 | No. | 10 |
| Barrels and kegs, wooden/slack/ .....                  | 950 55 30 | No. | 10 |
| Boxes, wooden, empty .....                             | 950 66 20 | —   | —  |
| Crates, wooden, empty .....                            | 950 66 30 | —   | —  |
| Spools, wooden .....                                   | 950 66 40 | —   | —  |
| Bobbins, wooden except textile machine .....           | 950 66 40 | —   | —  |
| Reels, cable and wire, wooden .....                    | 950 66 50 | —   | —  |
| Reels, wire wooden .....                               | 950 66 50 | —   | —  |
| Cores, wooden, for winding paper .....                 | 950 66 70 | —   | —  |
| Bins and hoppers, wooden, shipping type .....          | 950 66 80 | —   | —  |
| Skids, wooden, shipping type .....                     | 950 66 81 | —   | —  |
| Racks, wooden, shipping type .....                     | 950 66 82 | —   | —  |
| Pallets, wooden, shipping type .....                   | 950 66 83 | —   | —  |
| Tote boxes, wooden, shipping type .....                | 950 66 84 | —   | —  |
| Shipping containers, wooden/nes .....                  | 950 66 90 | —   | —  |

## Non-Reusable Packaging

|   |           |   |   |
|---|-----------|---|---|
| Packaging, non-reusable, metal .....                | 970 10 20 | — | — |
| Packaging, non-reusable, glass .....                | 970 10 30 | — | — |
| Packaging, non-reusable, paper/paperbd/pulpbd ..... | 970 10 40 | — | — |
| Packaging, non-reusable, wooden .....               | 970 10 50 | — | — |
| Packaging, non-reusable, textile .....              | 970 10 60 | — | — |
| Packaging, non-reusable, plastic .....              | 970 10 70 | — | — |
| Packaging, non-reusable, nes .....                  | 970 10 90 | — | — |

### *Goods Returned after Export*

All goods returned to Canada within five years of export and entered under tariff item 7090501 or 7091001 should be assigned commodity codes as defined by the '97030' five-digit structure presented below.

### Goods Returned

|   |           |   |   |
|---|-----------|---|---|
| Canadian goods ret'd, in shuttle service .....      | 970 30 15 | — | — |
| Canadian goods ret'd, food/feed/bev/tobacco .....   | 970 30 20 | — | — |
| Canadian goods ret'd, other prim/basic prods .....  | 970 30 30 | — | — |
| Canadian goods ret'd, general purp ind machy .....  | 970 30 50 | — | — |
| Canadian goods ret'd, material handling machy ..... | 970 30 51 | — | — |
| Canadian goods ret'd, metalworking machy .....      | 970 30 52 | — | — |
| Canadian goods ret'd, special purpose machy .....   | 970 30 53 | — | — |
| Canadian goods ret'd, machy nes exc agr .....       | 970 30 59 | — | — |
| Canadian goods ret'd, agr mach incl tractors .....  | 970 30 60 | — | — |
| Canadian goods ret'd, trucks and trk tractors ..... | 970 30 61 | — | — |
| Canadian goods ret'd, motor vehicles nes .....      | 970 30 69 | — | — |
| Canadian goods ret'd, apparel and accessories ..... | 970 30 70 | — | — |
| Canadian goods ret'd, nes .....                     | 970 30 89 | — | — |

### *Commodity Code Format*

The B-3/B-6 entry form is designed to accommodate a full seven digits in the box allocated for the commodity code. The complete seven-digit number must always be inserted. Each leading zero should always be entered (e.g. 006 40 20 is entered 0064020).

## **E) How to find a Commodity Code**

With experience, manual users will develop a selection procedure which services their particular circumstances most effectively. The two general methods outlined below attempt to illustrate the processes involved and the possible alternatives and pitfalls which may be encountered.

### *Use of the Alphabetical Index (Part III)*

As mentioned earlier, the index uses the keyword principle to structure the product descriptor and to determine the placement of that descriptor in the alphabetical sequence. To illustrate by example, let us assume a shipment in which the goods are described as outboard motors. The identifiable selection steps might be:

- (i) Identify the keyword in the description. In this case the answer to the question "what is it?" would be motors.
- (ii) Referencing the M section of the index we find the descriptor "Motors, outboard" next to the C.I.T.C. code 592 50 10. The quantity requirement is numbers with unit of measure code '10'.

(iii) Alternatively, if the invoice description had been a marine engine with a jet propulsion unit, we would have used the keyword engine. Referring to the index we encounter what appears to be initially three equal possibilities.

|  |           |
|--|-----------|
| a) Engines, Gas, Marine, Exc. Outboard         | 592 40 20 |
| b) Engines, Inboard-Outboard, Propulsion units | 592 19 10 |
| c) Engines, Jet, Gen. Purp. Exc. Aircraft Type | 502 99 89 |

Since we have a specific end use (marine) indicated in the invoice description we can immediately exclude possibility c). With respect to our description it would appear either a) or b) might apply. To resolve this question it becomes necessary to refer to the numeric schedule. A quick scan of the '592' group reveals that a class exists for "Drives, Jet, marine c/w engine 592 99 20". Jet propulsion units may also be referred to as a jet drive. Since the drive is combined with (c/w) an engine the C.I.T.C. class 592 99 20 would be assigned to this transaction. The correct C.I.T.C. class turns out to be neither of those selected under the alphabetical approach. This particular example serves to illustrate that for all cases where the product description encountered in the alphabetic does not describe the commodity precisely or where on N.E.S. term is encountered in the descriptor, it would be advisable to cross-reference with the group contents presented in the numeric schedule.

#### *Use of the Numeric Schedule (Part II)*

Sole use of the numeric schedule requires a knowledge of the classification structure. To illustrate the search steps involved in this method we might use as an example a shipment of goods described as replacement parts for a refrigeration compressor unit.

- (i) A summary of the classification can be found on page 18. Since compressor parts are considered end products we can begin our scan with the '500' group headings. We quickly encounter a group descriptor of "Air conditioning and refrigeration equipment 655".
- (ii) Using the group code of 655, we refer to the numeric schedule to scan the detailed class descriptions. At the five-digit level we find a descriptor of "Refrigeration Compressor Units". All the classes within the five-digit level refer to complete units. A subsequent five-digit header relates to "Air Conditioning and Refrig. Equipment and Parts N.E.S."
- (iii) Since this is the only category mentioning parts, the seven-digit class - 655 99 28 - "Compressor Units, Refrigeration, Parts of" is the correct commodity code for this shipment.
- (iv) For an importer or broker who specializes in a very narrow range of products, it is quite conceivable to dispense with the alphabetic portion of the manual, referencing but a few pages of the numeric index.

## **F) General Comments**

### *Units versus Parts*

Complete units are always segregated from parts by the classification. The parts portion of a shipment will always use a commodity code carrying the qualifier "parts of". Parts classes do not have a C.I.T.C. quantity requirement; complete unit classes usually require quantity data. With regard to N.E.S. classes, it is important that all specific C.I.T.C. codes be examined for applicability prior to assigning the residual code for a commodity family.

### *Commodity Coding Assistance*

Should the identification of the appropriate commodity code prove difficult, assistance may be obtained from Statistics Canada representatives located at the following port offices:

|           |          |
|-----------|----------|
| Vancouver | 544-1653 |
| Calgary   | 231-4612 |
| Winnipeg  | 985-3762 |
| Toronto   | 966-8133 |
| London    | 679-4489 |
| Hamilton  | 523-2930 |
| Montreal  | 283-4001 |
| Mirabel   | 476-3252 |
| Quebec    | 694-4909 |
| Ottawa    | 593-7222 |

The personnel located at these ports have a general background in applying C.I.T.C. codes to product descriptions. If they are unable to select a satisfactory commodity code the query will be referred to a team of commodity specialists for a decision. If it is not possible to contact Statistics Canada personnel at the above ports, a request for commodity code containing all relevant documentation may be forwarded directly to the commodity specialist group at the following address.

Enquiry Control Unit,  
External Trade Division,  
Statistics Canada,  
Ottawa, Ontario K1A 0T6 or  
Telex 053-3585  
Telephone (613) 996-4509

#### *Additional Copies*

Copies of the Canadian International Trade Classification manual (Cat. No. 65-502E English and 65-502F French) may be obtained by writing:

Publications Distribution,  
Statistics Canada,  
Ottawa, Ontario K1A 0T6

The charge for each copy will be \$9.75. Please enclose a cheque made out to the Receiver General for the correct amount.

#### *Computer Tape File*

A computer tape file of the C.I.T.C. manual is also available on request. The computer file forwarded will be an industry compatible 9 track 1600 bytes per inch (BPI) tape using the Extended Binary Coded Decimal Interchange Code (EBCDIC), odd parity format. Additional record format information will be provided at the time of request. The charge of \$100.00 includes the price of computer tape. Please direct all requests to the address provided above.

## Units of Measure

For purposes of the C.I.T.C. certain units of measure are acceptable in both the Imperial and the metric systems. In these cases the same units of measure are used.

| Unit of measure | Unit of measure code | Explanation  |
|-----------------|----------------------|--|
| NO              | 10                   | Number (Number of cars; Number of sheets of plywood etc.)  |
| PAIR            | 11                   | Number of pairs  |
| DZ PR           | 12                   | Number of pairs in dozens  |
| DOZ             | 13                   | Number in dozens   |
| GROSS           | 14                   | Number in gross  |
| DZ BT           | 15                   | Number of bottles in dozens for fermented alcoholic beverages  |
| C               | 16                   | Number in hundreds   |
| M               | 17                   | Number in thousands  |

## LUMBER

LUMBER IS USUALLY RECTANGULAR-SAWN TO STANDARD SIZES AND USUALLY NOT LESS THAN 6' LONG. THE MOST COMMON DIMENSIONS OF CONSTRUCTION LUMBER ARE 1"x6", 2"x4", 2"x8", 2"x12", 4"x4" IN CROSS-SECTION AND 7', 8', 10', 12' ETC IN LENGTH AND KNOWN BY THE TERM "DIMENSION LUMBER". [DO NOT CONFUSE WITH DIMENSION-SAWN (33390) WHICH ARE SHORT (LESS THAN 6') PIECES OF WOOD, FLAT OR SQUARE, FOR TURNING OR GLUEING]. IN NORTH AMERICA, SOFTWOOD LUMBER IS USUALLY TRADED IN DRESSED OR PLANED FORM. HARDWOOD LUMBER IS USUALLY SHIPPED IN ROUGH FORM.

### LUMBER CONVERSION FACTORS:

CUBIC FEET X 0.012 = MBF  
CUBIC METERS X 0.424 = MBF  
SQ FT X THICKNESS IN INCHES X 0.001 = MBF

EXCLUDE SAWMILL PRODUCTS (333) AND OTHER WOOD FABRICATED MATERIALS (339).

## 365 OTHER VEGETABLE FIBRE YARN AND THREAD

INCLUDE ONLY YARN AND THREAD WHICH CONTAIN 95% OR MORE BY WEIGHT OF ONE  
VEGETABLE FIBRE OTHER THAN COTTON.  
EXCLUDE YARN AND THREAD WHICH CONTAIN LESS THAN 95% BY WEIGHT OF VEGETABLE  
FIBRE OTHER THAN COTTON (367).

|-------------------|---|----------------------------------|--------------------|------------------|--------------------------------|
| 418               | <b>AGRICULTURAL CHEMICALS, FORMULATED, INSECTICIDES AND RODENTICIDES</b>  |                                  |                    |                  |                                |
|                   | THE TERM PESTICIDE IS USED AS A COLLECTIVE NOUN TO COVER ALL PRODUCTS USED TO DESTROY, CONTROL OR ATTRACT PESTS AND REGULATE PLANT GROWTH.  |                                  |                    |                  |                                |
|                   | THE TERM FORMULATED PESTICIDE REFERS TO SEPARATE CHEMICALLY DEFINED COMPOUNDS DILUTED OR COMBINED WITH MATERIALS SUCH AS LIGHT PETROLEUM OILS, FINELY-GROUNDS INERT MATERIALS, EMULSIFIERS, PENETRANTS, WETTING OR SPREADING AGENTS, ETC... AND TO BE USED AS PESTICIDES. |                                  |                    |                  |                                |
|                   | EXCLUDE SEPARATE CHEMICALLY DEFINED COMPOUNDS (400 TO 413) AND INDUSTRIAL PESTICIDES (42963).   |                                  |                    |                  |                                |
|                   | THIS GROUP INCLUDES ONLY FORMULATED PESTICIDES AND CONTAINS TWO MAIN PARTS:   |                                  |                    |                  |                                |
|                   | A) 41820 TO 41857 LISTS PESTICIDES (REGARDLESS OF THEIR ACTION) ACCORDING TO THEIR ACTIVE INGREDIENT.   |                                  |                    |                  |                                |
|                   | B) 41858 TO 41898 LISTS PESTICIDES ACCORDING TO THEIR ACTION E.G. (FUNGICIDE, HERBICIDE, RODENTICIDE, INSECTICIDE ETC...).  |                                  |                    |                  |                                |
|                   | WHEN CLASSIFYING PESTICIDES, A) TAKES PRECEDENCE OVER B).   |                                  |                    |                  |                                |
|                   | <b>PESTICIDES BASED ON BOTANICAL EXTRACTS</b>   |                                  |                    |                  |                                |

| ALLOY STEEL CONTAINS SPECIFIED MINIMUM AMOUNTS OF SPECIFIED ALLOYING ELEMENTS. ALLOY STEELS INCLUDE THOSE WHICH ARE DESIGNATED BY A.I.S.I. (AMERICAN IRON AND STEEL INSTITUTE) AND/OR S.A.E. (SOCIETY OF AUTOMOTIVE ENGINEERS) SPECIFICATION NOS. 1330 TO 9850, EXCLUDING NOS. 1513 TO 1572.                                     |  |                             |      |                    |                  |                           |      |
| CARBON STEELS INCLUDE THOSE WHICH ARE DESIGNATED BY A.I.S.I. AND/OR S.A.E. SPECIFICATION NOS. 1000 TO 1329 AND 1513 TO 1572.   |  |                             |      |                    |                  |                           |      |
| STAINLESS STEEL INCLUDES ALL GRADES OF STEEL CONTAINING 10 PER CENT OR MORE OF CHROMIUM, WITH OR WITHOUT OTHER ALLOYS OR A MINIMUM COMBINED CONTENT OF 18 PER CENT OF CHROMIUM AND OTHER ALLOYS. STAINLESS STEEL INCLUDES THOSE WHICH ARE DESIGNATED BY A.I.S.I. SPECIFICATION NOS. 201 TO 546 AND VALVE STEELS 21-2N AND 21-4N. |  |                             |      |                    |                  |                           |      |

|                   | SEE ALSO NOTE 442 FOR DEFINITION OF ALLOY, CARBON, STAINLESS AND TOOL STEEL.  |                             |      |                    |                  |                           |      |
|                   | WIRE, STEEL (44912 TO 44945) IS "SINGLE" WIRE IN THE FORM OF A THREAD OR SLENDER ROD.   |                             |      |                    |                  |                           |      |
|                   | WIRE OF IRON OR STEEL IS A DRAWN, NON-TUBULAR PRODUCT:  |                             |      |                    |                  |                           |      |
|                   | A) IF IN COILS OF ANY CROSS-SECTIONAL SHAPE OR DIMENSION;   |                             |      |                    |                  |                           |      |
|                   | B) IF IN STRAIGHT CUT LENGTHS, WITH A MAXIMUM CROSS-SECTIONAL DIMENSION OF 0.50 INCH OR;  |                             |      |                    |                  |                           |      |
|                   | C) IF COLD ROLLED FLAT AFTER DRAWING, WITH A MAXIMUM WIDTH OF 0.50 INCH, IN COILS OR IN STRAIGHT CUT LENGTHS.   |                             |      |                    |                  |                           |      |
|                   | WIRE STRAND IN ITSELF IS NOT WIRE ROPE. IT CONSISTS OF A NUMBER OF WIRES, ALL OF THE SAME DIAMETER, TWISTED HELICALLY AROUND A SINGLE WIRE OF THE SAME SIZE. A WIRE STRAND MAY SHOW THE SPECIFICATION "1 X 19", WHICH MEANS THERE ARE 18 OUTER WIRES AROUND ONE WIRE.             |                             |      |                    |                  |                           |      |
|                   | WIRE ROPE CONSISTS OF A NUMBER OF WIRE STRANDS TWISTED HELICALLY TOGETHER, USUALLY AROUND A FIBRE OR STEEL WIRE CORE, E.G. (FC IS FIBRE CORE, INRC IS INDEPENDENT WIRE ROPE CORE). WIRE ROPE DESCRIBED AS "6 X 19", CONSISTS OF 6 WIRE STRANDS, EACH WIRE STRAND HAVING 19 WIRES. |                             |      |                    |                  |                           |      |
|                   | WIRE, PLASTIC COATED OR COVERED IS NOT NECESSARILY INSULATED.   |                             |      |                    |                  |                           |      |

## MECHANICAL POWER TRANSMISSION EQUIPMENT AND BEARINGS

WHEN MECHANICAL POWER IS PRODUCED BY SUCH DEVICES AS ENGINES (502), ELECTRIC MOTORS (503), FOR THE PURPOSES OF POWERING INDUSTRIAL MACHINERY, IT IS THE FUNCTION OF MECHANICAL POWER TRANSMISSION EQUIPMENT TO TRANSMIT, BY MECHANICAL MEANS, THIS POWER TO THE UTILIZING MACHINERY CLASSIFIED TO GROUPS (505 TO 529)

INCLUDE POWER TRANSMISSION EQUIPMENT NOT FORMING PART OF OR INCORPORATED IN A MACHINE OR VEHICLE EVEN IF STATED TO BE PART OF A SPECIFIC MACHINE OR VEHICLE (EXCEPT MOTIVE POWER TRANSMISSION EQUIPMENT E.G. DRIVE TRAIN, CLASSIFY TO VEHICLE CONCERNED).

EXCLUDE POWER TRANSMISSION EQUIPMENT BUILT-IN OR INCORPORATED IN A SPECIFIC MACHINE OR VEHICLE ENTERED ON THE SAME ENTRY. (CLASSIFY TO THE MACHINE OR VEHICLE CONCERNED).
